Preface vii

Chapter 1. Theory of integrable systems

Toda chain and nonlinear Schrödinger equation. Nonlocalities
A.B. Shabat 1

Huygens' principle and integrable systems
A.P. Veselov 9

Linear operators with self-consistent coefficients and rational reductions of KP hierarchy
I. Krichever 14

Stationary flows: Hamiltonian structures and canonical transformations
A.P. Fordy 20

Classification of third order integrable evolution equations
R.H. Heredero, V.V. Sokolov and S.I. Svinolupov 32

Numerical simulation of quasi-periodic solutions of the sine-Gordon equation
M.J. Ablowitz, B.M. Herbst and M. Schober 37

The new look on the theory of integrable systems
A.N. Leznov 48

Integrable deformations of a polygon
V.E. Adler 52

Generalized Hirota bilinear identity and integrable q-difference and lattice hierarchies
L.V. Bogdanov 58

Magnetic dipole in tunnel junction and solution of the boundary value problem by inverse scattering transform
A.B. Borisov and V.V. Kiseliev 64

Nonintegrability of the Bianchi IX model
A. Latifi, M. Musette and R. Conte 70

Period preserving nonisospectral flows and the moduli space of periodic solutions of soliton equations
P.G. Grinevich and M.U. Schmidt 73

The Davey–Stewartson equation and constrained linear flows
F. Guil and M. Mañas 99

Additional symmetries for super KP hierarchies
Manuel Mañas, Luis Martínez Alonso and Elena Medina 105

Reflectionless potentials and soliton series of the nonlinear Schrödinger equation
V.Yu. Novokshenov 109

On a structure of the explicit solutions to the Davey–Stewartson equations
D. Pelinovsky 115

Dressing of a two-dimensional nontrivial potential
M. Boiti, F. Pempinelli and A. Pogrebkov 123

Darboux transformations for "*W*-problems"
H. Steudel and R. Meinel 127

Integrable boundary value problems for the multicomponent Schrödinger equations
I.T. Habibullin and S.I. Svinolupov 134

Master symmetries for differential-difference equations of the Volterra type
I.Yu. Cherdantsev and R.I. Yamilov 140

Chapter 2. Asymptotic and perturbative methods for integrable and near integrable models

On a class of physically important integrable equations
A.S. Fokas 145

The nonlinear Schrödinger Hierarchy in perturbation theory
A. Degasperis 151

The variational principle for nonlinear waves in dissipative systems
D.J. Kaup and B.A. Malomed 155

Curved asymptotic solitons of Kadomtsev–Petviashvili-I and modified Kadomtsev–Petviashvili-I equations
I.A. Anders 160

On the continuous Benney equations
V.V. Geogjaev 168

Asymptotic analysis of the Marchenko integral equation and soliton asymptotics of a solution of the nonlinear Schrödinger equation
V.P. Kotlyarov 176

Decay of an initial discontinuity in the defocusing NLS hydrodynamics
G.A. El, V.V. Geogjaev, A.V. Gurevich and A.L. Krylov 186

Weak interaction of the KdV solitons under perturbation
L.A. Kalyakin 193

Chapter 3. Applications to nonlinear optics, fluid mechanics and plasma physics

Nonlinear interaction of solitons and radiation
E.A. Kuznetsov, A.V. Mikhailov and I.A. Shimokhin 201

Phase diffusion and phase propagation: interesting connections
A.C. Newell and Y. Pomeau 216

Five-wave interaction on the surface of deep fluid
A.I. Dyachenko, Y.V. Lvov and V.E. Zakharov 233

All-optical-switching and pulse amplification and steering in nonlinear fiber arrays
A.B. Aceves, C. De Angelis, G.G. Luther, A.M. Rubenchik and S.K. Turitsyn 262

Sharper criteria for the wave collapse
E.A. Kuznetsov, J.J. Rasmussen, K. Rypdal and S.K. Turitsyn 273

Joint behavior of inertio-gravity and Rossby waves
G. Falkovich, A. Shafarenko and G. Wilford 285

"Explosive" evolution of galaxies (an analog of collapse) and appearance of quasars in the merger model
V.M. Kontorovich, D.S. Krivitsky and A.V. Kats 290

On Landau damping in models of Langmuir turbulence
G.M. Fraiman and I.Yu. Kostyukov 295

Two-dimensional wave collapse in the boundary layer
A.I. D'yachenko and E.A. Kuznetsov 301

Topography of attractors of the parametrically driven nonlinear Schrödinger equation
M. Bondila, I.V. Barashenkov and M.M. Bogdan 314

The temperature-dependent collapse regime in a nonlinear dynamical model of Scheibe aggregates
P.L. Christiansen, K.O. Rasmussen, O. Bang and Yu.B. Gaididei 321

Long-term evolution of strong 2-D NSE turbulence
G.M. Fraiman, E.M. Sher, A.D. Yunakovsky and W. Laedke 325

Steady-state gas discharges in focused wave beams
V.B. Gildenburg, T.A. Petrova and A.D. Yunakovsky 335

Dynamics of fluid surface in multidimension
N.A. Inogamov and S.I. Abarzhi 339

Transformation of electromagnetic beams into surface waves on nonlinear interface
A.V. Kochetov, A.G. Litvak, V.A. Mironov and E.M. Sher 342

Raman spikes of pump repletion are not solitons
C. Claude, F. Ginovart and J. Leon 380

Modulational instability analysis of surface–waves in the Bénard–Marangoni phenomenon
R.A. Kraenkel, M.A. Manna and J.G. Pereira 356

All we know about hole solutions in the CGLE
O. Stiller, S. Popp, I. Aranson and L. Kramer 361

Nonlinear Schrödinger models and modulational instability in real electrical lattices
P. Marquié, J.M. Bilbault and M. Remoissenet 371

Nonlinear theory of Kelvin–Helmholtz instability
S.K. Zhdanov 375

List of contributors 380
